## PROFILE

Passionate and inquisitive Front End Web Developer with circa 5 years' experience in freelancing, full time employment and self learning, demonstrating a strong commitment to continuous growth and professional development since career change in 2020.

Currently working as a full-time Front End Developer at Juniper Education who provide the educational sector with multiple technical solutions, including Websites and online presence.

I am freelancing at weekends and evenings to keep up to date with the latest technologies and have recently built a feature-rich construction website for a client using **Next.js**, **Typescript**, **Sanity.io CMS** and **Tailwind** (see below).

I genuinely enjoy all parts of Web Development and want to keep challenging myself in the field.

## CURRENT POSITIONS

### Front End Developer

Juniper Education Sept '23 - Present  
[Ed-Tech provider for the education sector, including web design and development services](#)

- HTML, **SCSS**, **Javascript** & **ASP.NET**(surface level) focused role, building multiple school and teaching centre websites
- Consistently meeting project timescales and exceeding client and project management expectations
- **Pixel-perfect** websites build from professional designs on Adobe XD
- Working from challenging and diverse designs, using own initiative for transitions, animations and mobile layouts
- Reactive to 'Odd Jobs' (tickets) to fix or add features to existing clients, working with both modern and legacy codebases
- Supporting Junior devs on technical aspects
- Ticket quoting for time required for fixes and new features being added to existing websites
- Ensuring all websites are **WCAG compliant**, as this is a legal requirement for school/government websites

### React / Next JS Freelancer

Freelancing & Continued Learning 2018 - Present

- Managing freelance work in evenings and weekends to gain as much experience possible, focusing on **Typescript**, **Next.js**, **CSS** and **Tailwind**, all designed and prototyped on **Figma**.
- Recently built a feature-rich construction business' website using Next.js, Typescript, **Sanity.io (CMS)**, Tailwind and CSS, using **GitHub** for version control
  - <https://roscoandperlini.co.uk/>
  - **Pixel-perfect** website developed from a professional design on Figma with fast and fluid user experience
  - Reusable components used throughout to keep code maintainable
  - Configured for **preview editing**, allowing client to review changes before publishing them
- Built an e-commerce store using **Next.js** & **Typescript** with **Medusa.js** (Headless, open-source ecommerce platform)
  - <https://lce-front.vercel.app/> \*NB. awaiting instruction to launch
  - Headless ecommerce, working with and adapting existing code in **Typescript** and **Next.js** for a custom setup as per client requirements
  - Built **custom email templates** for customer transaction (order confirmations, account sign up etc)
  - Frontend hosed on **Vercel**, backend hosted on **Digital Ocean**

## BOOTCAMP/TRAINING EXPERIENCE

Le Wagon Bootcamp (full-time intensive)

Oct '22 - Dec '22

- Learned **Ruby on Rails**, **Javascript & Stimulus.js**, **Git workflows**, data extraction from web scraping & **APIs**, Software Design Patterns (MVC), **writing maintainable code**, **Relational Databases**, **Webpack & NodeJS**
- Worked with 'buddies' every day to solve multiple challenges
- Communicated through **Slack & Zoom**, collaborated on **GitHub**
- Developed 2 ideas into a live web application. My team's final project was built in 10 days (materialised.shop)

[Materialised source code](#) (built with Ruby on Rails)

## OTHER CAREER EXPERIENCE

### Operations Supervisor and Supplies Manager (construction)

Rosco & Perlini

Nov '20 - Oct '22

- Liaised with the Director to ensure the business is operating at a high efficiency
- Oversaw operations of several site locations to maintain high-level finishes of works with a detailed eye
- Liaised with clients to maintain relationships and provide updates
- Organised site materials for new and existing jobs
- Maintained and increased team morale in harsh weather and conditions

### Recruitment Consultant

Just Pharma

Apr '19 - Nov '20

- Provided consultancy approach to candidates and clients

### Country Homes Negotiator

Mullucks Wells Estate Agents

Nov '16 - Apr '19

- Met with clients to discuss marketing strategy and retain property instructions
- Succinctly communicated with clients

### Multiple roles - Organisation Manager, Shop Manager, Cashier

Bloxham Bookmakers

Apr '08 - June '16

- Oversaw operations of family business
- Training and development of staff
- Implemented strategic business plans and marketing strategies
- Designed digital and print posters for shopfront

## HOBBIES & INTERESTS

- DIY, home renovations & gardening - recently refurbished our victorian cottage
- Golf, running, general fitness and cooking

## COVER LETTER

Please find attached my CV for your consideration.

Since transitioning from sales to tech a few years ago, I've never looked back. With a strong background in client-facing roles, I discovered my passion for web development in 2018 while seeking a new challenge and a fresh start.

I'm currently working as a Front-End Developer at Juniper Education, an Ed-Tech provider, where I quickly established myself within the department. I've consistently taken on more complex projects, progressing from standard bespoke builds to multi-site trusts, federations, and pre-designed solutions.

Although I've gained valuable skills in this role, I feel my learning curve has begun to plateau due to the focus on the inner workings of Juniper's custom-built, in-house CMS. I'm eager to further my career by working with modern web technologies, embracing exciting advancements in CSS and JavaScript, while leveraging my freelancing experience with React and Next.js as a strong foundation for growth.

Prior to my role at Juniper Education, I was predominantly self-taught through books, online resources, and freelance projects. To accelerate my growth and transition into the tech industry, I had the privilege of attending Le Wagon's bootcamp ([www.lewagon.com](http://www.lewagon.com)), which helped me secure my first full-time role in web development.

- Currently building and maintaining websites for an Ed-Tech company using Vanilla **JavaScript**, **SCSS**, **HTML**, and **ASP.NET**.
- **3-4 years of front-end development experience**, with over a year in my current full-time role. Wrote my first line of code in 2018.
- Successfully designed, built, and launched freelance websites using **React**, **Next.js**, Gatsby, **TypeScript**, **Tailwind**, and headless CMS platforms like **Sanity.io** and **Strapi**.
- Proficient in version control with **GitHub**, with deployments handled via **Vercel** and **Netlify** (frontend) and **DigitalOcean** (backend and databases).
- Seeking new opportunities to advance my career and work with modern technologies, as growth is limited in my current role due to a focus on a dated, custom-built CMS.
- Bootcamp experience with **Ruby on Rails**, relational databases, project management, team leadership, and GitHub collaboration (branching, merging, pull requests).
- Currently working fully remote, with strong communication skills using tools like Microsoft Teams and Slack; **open to hybrid working arrangements**.
- Actively enhancing my Next.js, Javascript and TypeScript skills through a personal full-stack project - a 'one-stop' recipe and shopping app with integrated AI technologies, built using Next.js, OpenAI's API, Express.js, PostgreSQL, and Prisma ORM.

I hope my profile has grabbed your attention and I could be a good fit within your organisation, please let me know if you have any questions and I look forward to hearing from you.

Best regards,  
Stuart
